

Serial No. 09/713,843
P. Berg et al.
Amendment and Request for Reconsideration

IN THE DRAWINGS

The Examiner objected to Figure 11D, stating that the illustrated boxes require a clear label of what they represent, and requested a corrected drawing. In accordance with 37 CFR § 1.121(d) and MPEP § 608.02(p), attached to this Amendment as "Attachment A" is a replacement drawing for Figure 11D. As indicated in Attachment A, Figure 11D now shows a field area 340 that is subdivided into subfield areas 1102, 1104, 1106 in connection with the process described in the flow diagram of Figure 10. The supporting text in the specification occurs at page 14, lines 15-20 and at page 33, line 11 through page 36.
